

SIDDHARTH SINGH

Full Stack Developer | Software Engineer — React · Node.js · Java · Spring Boot

singhsiddharth9238@gmail.com | +91-9938090229 | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) (150+ problems)

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience architecting secure, role-based enterprise systems using React, Node.js, Java, Spring Boot, and RESTful APIs. Improved data retrieval speed by 65% and reduced API error rates by 80% through backend optimization, validation, and asynchronous integration work. Skilled in building REST APIs, authentication/authorization systems, and CI/CD-integrated code quality workflows across full-stack production environments. Seeking to bring proven full-stack engineering ability and a strong DSA foundation (150+ LeetCode problems) to a Full Stack Developer role.

TECHNICAL SKILLS

Languages: Java (Core & Advanced), JavaScript (ES6+), TypeScript, Vite, Golang, SQL, Python, C/C++
Frontend: React.js, Next.js, NestJS, HTML5, CSS3, Tailwind CSS, Bootstrap 5, Flutter, Responsive UI Development
Backend: Spring Boot, Spring Security, Node.js, Express.js, JPA/Hibernate, JDBC, Servlets
Databases: PostgreSQL, MySQL, SQLite, Schema Design, Query Optimization
APIs & Architecture: REST APIs, JWT Authentication, OAuth 2.0, Role-Based Access Control (RBAC), MVC Architecture, AJAX (Fetch/Axios), Enterprise Workflows
Cloud & DevOps: Docker, Grafana, Prometheus, Git, GitHub, Linux, Maven, CI/CD
Testing & Code Quality: Postman, SonarQube, ESLint, Prettier, Debugging, Performance Optimization
Concepts: Data Structures & Algorithms (150+ LeetCode), OOP, Object-Oriented JavaScript (OOJS), Multithreading, SDLC, Agile Methodologies

PROFESSIONAL EXPERIENCE

- Software Engineer Trainee — Nvisagecomp Solutions LLP** Nov 2025 – Apr 2026
- Shipped full-stack features for an enterprise client, using **AJAX (Fetch/Axios)** to asynchronously connect a **React frontend (ES6, Babel)** with a **Java/Spring Boot** backend, accelerating data retrieval speeds by **65%**.
 - Developed and deployed **REST API** endpoints managing core business logic, including **database-backed CRUD operations** and structured error handling, supporting **75+** concurrent user sessions.
 - Ensured enterprise-grade code quality by identifying and resolving **60+** server-side bugs and vulnerabilities flagged by **SonarQube** in the **CI/CD pipeline**, including critical null-handling and transaction issues.
- Full Stack Web Developer Intern — YHills** Jul 2025 – Oct 2025
- Built scalable modules integrating Web Services by constructing Java backends and consuming data asynchronously from a **React frontend via AJAX (Fetch/Axios)**, increasing application rendering efficiency by **70%**.
 - Diagnosed and resolved frontend-backend integration bottlenecks by standardizing error response formats and improving backend input validation, reducing **API error rates by 80%**.

PROJECTS

- PulseOps — Enterprise Monitoring & AI Operations Platform (Built on Grafana)** March 2026 – April 2026
Go, React.js, TypeScript, Redux Toolkit, Grafana, Prometheus, SQLite, Docker, REST APIs
- Architected a high-performance enterprise observability platform utilizing **React.js, TypeScript, and Redux Toolkit**, integrating **Prometheus** time-series data to deliver real-time, AI-enhanced telemetry dashboards.
 - Engineered scalable, concurrent **Go microservices** encompassing secure **RESTful APIs**, implementing robust **Role-Based Access Control (RBAC)**, **JWT authentication**, and automated alert orchestration, while integrating AI-driven incident analysis and automated PDF reporting pipelines, leveraging **SQLite** for highly optimized, ACID-compliant state management and persistent data storage.
 - Containerized the full-stack infrastructure utilizing **Docker**, establishing isolated environments to streamline **CI/CD pipelines** and ensure seamless deployment of monitoring agents and **Grafana visualizations**. [\[Project Link\]](#)
- TREK — AI-Powered Travel Planning & Booking Platform** January 2026 – February 2026
Vite, React.js, TypeScript, Node.js, Express.js, SQLite, JWT, RBAC, REST APIs, Docker, Gemini API
- Architected a secure, full-stack SPA using **Vite, React.js, and TypeScript**, backed by an **Express.js RESTful API (MVC architecture)** that features robust middleware pipelines, **JWT-based authentication**, and granular **RBAC** to secure complex user booking workflows.
 - Orchestrated asynchronous third-party **API integrations**—including the **Gemini API, Google Maps, and live Aviation data**—to engineer dynamic, context-aware AI travel itinerary generation and real-time spatial visualizations.
 - Engineered optimized **SQLite** relational schemas to efficiently process transactional booking records, and containerized the backend services and database environments using **Docker** to ensure cross-environment consistency and scalable deployment. [\[Project Link\]](#)
- Vendor Compliance & Risk Management System** Mar 2025 – Apr 2025
Java, Spring Boot, Spring Security, JPA/Hibernate, PostgreSQL, JWT, RBAC, REST APIs, Docker
- Architected an enterprise-grade backend using **Spring Boot, Spring Security, JPA/Hibernate ORM, and layered MVC architecture**, implementing **JWT authentication, RBAC, audit logging, and scheduled compliance monitoring** across **70+** compliance parameters. [\[Project Link\]](#)

EDUCATION

Master of Computer Applications (MCA), Adamas University — CGPA: 8.1/10 2024 – 2026
Bachelor of Computer Applications (BCA), Utkal University — CGPA: 7.0/10 2021 – 2024

CERTIFICATIONS

SAP ABAP Cloud Backend Developer | SAP FI/RI Application Developer | SAP BTP Solution Architect | Oracle Cloud Infrastructure (OCI) [\[Certification\]](#)
